OBJECTIVE

To obtain a Software Developer role where I can utilize my programming skills and contribute to building scalable and user-friendly applications while improving my technical expertise.

PROJECTS

Student Notesphere – Full Stack Notes & Quiz Platform (Ongoing Major Project)
Building a MERN-based academic platform with role-based authentication, dynamic notes management, admin dashboard, advanced search, and customizable quiz generation (unit-wise / whole-subject) using Node.js, Express.js, MongoDB, HTML, CSS, and JavaScript.

My Portfolio
Personal Portfolio Web App – React.js
Created a single-page portfolio application using React.js with reusable components and dynamic rendering. Designed a fully responsive UI, added smooth scrolling navigation, and integrated a contact section for user communication. Focused on clean code structure and performance.

Super Mart Billing System
Developed a console-based Supermart Billing System using C++ and file handling (fstream) to manage product records and generate customer bills. The system supports adding, updating, searching, and deleting product details, calculates total amount with quantity-based billing, and stores data permanently in files for future use.
